NEW LONDON HOSPITAL

OUR MISSION: New London Hospital provides safe quality care for every patient, every time in partnership with patients, families and healthcare providers.

New London Hospital (NLH), founded in 1918 is a not-for-profit Critical Access Hospital serving 15 communities within the Kearsarge/Lake Sunapee region in central New Hampshire, providing primary care and specialized clinical services in a patient and family centered environment. In addition to services at the main campus in New London, primary and some secondary care are offered at the organization’s Newport Health Center, a rural health center founded in 1991 in Newport, NH.

In 2013, New London Hospital became a Dartmouth-Hitchcock affiliate which allows various specialty providers to split their time between D-H and NLH. Some of these areas include audiology, dermatology, gynecology, neurosurgery, oncology, orthopaedics, pre/post natal care and urology. As this partnership continues to grow and develop, the real beneficiaries are those we serve daily. As the health care landscape continues to reshape, we take pride in our ability surpass expectations of what many have come to associate with a community hospital.

New London Hospital is a member of the New England Alliance for Health (NEAH).

MEDICAL GROUP
Physician Practices are located in New London Hospital. Services offered range from Primary Care to General Surgery, Orthopaedics, Gynecology, Audiology, Urology, Dermatology, Neurological and Neurosurgical Services. Pediatrics Services are provided in the Medical Affiliates Building on the New London Hospital campus.

NEWPORT HEALTH CENTER
Located in Newport, the Newport Health Center offers Primary Care, Gynecology, Pediatrics, Occupational Health, Laboratory, X-ray, Ultrasound, Mammography, Physical Therapy, and Sports Medicine services. The Center has extended hours on Mondays and Wednesdays for evening appointments.
NEW LONDON PEDIATRIC CARE CENTER
Located in the Medical Affiliates Building, the New London Pediatric Care Center (NLPC) is a patient-focused medical practice specializing in pediatrics and adolescent health care for the Dartmouth-Lake Sunapee Region in collaboration with Children’s Hospital at Dartmouth (CHaD). The goal of NLPC is to provide high quality health care with an emphasis on preventive and primary care services. Pediatricians specialize in the sick and well care of children of any age, from infants to college.

NEW LONDON HOSPITAL SPORTS MEDICINE AND PHYSICAL REHABILITATION CENTER
The Sports Medicine and Physical Rehabilitation Centers provide a wide range of services in coordination with other programs in the Lake Sunapee region. Services and programs are for people of all ages with a wide variety of conditions. State-of-the-art therapy and specialized services are provided.

Rehabilitation services are located at New London Hospital and Newport Health Center in Newport.
PRIMARY CARE

Our primary care providers (PCPs) specialize in either Internal Medicine or Family Practice Medicine. Providers who specialize in Family Practice have received training in treating and caring for the entire family from pediatrics to geriatrics. Internal Medicine providers specialize in adult medicine. The primary care physician services provide high quality healthcare with an emphasis on preventive and primary care services. New London Hospital’s primary care service also has the ability to refer patients to specialists or diagnostic testing.

Our primary care providers (PCPs) offer the following services:
- Routine health care for all ages
- Sports physicals
- Hearing screenings
- Minor Orthopaedic problems
- Complete child care, including routine visits, immunizations and acute illnesses
- Women’s health care, including pap smears, and gynecological problems
- Minor procedures including removal of lesions and wart removal
- Occupational health screening including DOT physicals
- Men’s health care, including prostate screening

FELLOWSHIP: Cardiology Dartmouth-Hitchcock Medical Center, Hanover, NH 1985
COUMADIN SERVICES

Coumadin Services are designed to help patients manage anticoagulation medication. Once Coumadin is prescribed, it is very important to regularly check the medication’s effect on the blood’s clotting tendency. Offered in New London and at the Newport Health Center, the program is staffed by an experienced Registered Nurse Clinician who obtains International Normalized Ratio (INR) measurements using a fast and simple fingerstick method. Results are immediate, and any change of Coumadin dosage is made on the spot. Data from each visit including INR, patient assessment and dosage changes are sent to the referring physician the same day.

COUMADIN SERVICES AT:
NEW LONDON HOSPITAL 526-5053
273 County Road, New London
Open: 8:00 am - 4:30 pm Monday through Friday

NEWPORT HEALTH CENTER 863-4100
11 John Stark Highway, Newport
Open: Every Thursday 8:00 am - 4:30 pm

DERMATOLOGY

Dermatology consultations are seen at the New London Hospital in New London.

Offering treatment for:
- Actinic dermatitis
- Allergic dermatitis
- Seborrhea
- Psoriasis

WOMEN’S HEALTH

New London Hospital offers comprehensive gynecological services for women. It also provides special care in diseases of the female reproductive system, diagnostic and therapeutic care of patients with abnormal PAP smears, and care for patients with chronic pelvic pain.

Pre- and postnatal services in New London and Newport are offered through an affiliation with Dartmouth-Hitchcock Medical Center. Certified nurse midwives from DHMC offer pre- and postnatal care in New London with a seamless transition to labor and delivery at DHMC.

Medical gynecological services include:
- Adolescent gynecology/birth control options/pregnancy screening
- Assess abnormal bleeding
- Contraception options
- Essure hysteroscopic sterilization
- Infertility evaluation
- Preventive and diagnostic services
- Hormone Replacement Therapy (HRT)
- Pregnancy screening (pre and postnatal services)
- Evaluation, diagnosis and treatment of Sexually Transmitted Diseases (STDs)
- Evaluation of pre-menopause, menopause and post-menopause
- Evaluation of stress urinary incontinence and urodynamic studies

Surgical gynecological services include:
- D&Cs
- Ovarian cysts
- Treatment of stress urinary incontinence
- Breast cancer screening
- Endometrial Ablations
- Evaluation of abnormal PAP smears
- Pelvic relaxation and prolapse
- Routine PAP smears
- Hysterectomies
- Other gynecological surgeries
- Loop Electrocautery Excision Procedure (LEEP)

ANCILLARY SERVICES
CARDIOPULMONARY CARE / DIAGNOSTIC IMAGING AND RADIOLOGY

CARDIOPULMONARY CARE 603-526-5162
The department is staffed with Respiratory Care Practitioner (RCP) licensed respiratory therapists, who have passed the Certified Respiratory Therapy Technician (CRTT) or Registered Respiratory Therapist (RRT) examination by the National Board for Respiratory Care, as well as a registered diagnostic cardiac sonographer who is American Registry of Diagnostic Medical Sonographers (ARDMS) certified.

Services include:
- Chest physiotherapy
- Electrocardiograms (EKGs)
- Oxygenation evaluations
- Stress Echo Cardiogram
- Pulmonary Function Testing (PFTs)
- Assessment and support of mechanical ventilation
- Administration of aerosol medications by a variety of devices
- Echocardiograms
- Holter/loop/cardiac event monitoring
- Pulmonary disorders
- Cardiac stress testing

DIAGNOSTIC IMAGING AND RADIOLOGY 603-526-5249
The Radiology Department, in conjunction with DHMC Radiologists, offers routine radiology services, digital mammography, 3D Mammography, ultrasound, MRI, 64-slice CT Scan, Nuclear Medicine, bone density analysis, and Digital Fluoroscopy. We offer radiological services at New London Hospital and at the Newport Health Center. New London Hospital is an American College of Radiology accredited mammography, ultrasound, CT, Nuclear Medicine and MRI site.

BONE MINERAL DENSITY SCANS
A bone density test is a test that can diagnose osteoporosis before a broken bone occurs. This test helps estimate the density of your bones and your chance of breaking a bone. The procedure is painless and safe and usually takes 10 – 15 minutes. To prepare for your Bone Mineral Density test, dress comfortably wearing clothes without metal buttons, buckles or zippers. Bone Mineral Density Scans are available every Monday through Friday using our state of the art, GE Lunar Prodigy machine.

COMPUTED TOMOGRAPHY (C.T. SCAN)
24 hours a day, 7 days a week our state-of-the-art GE Revolution 64-slice Scanner is available for a wide range of imaging procedures, including CT, CTA and 3D post processing abilities. All technologists are registered radiologic technologists.

MAGNETIC RESONANCE IMAGING (M.R.I.)
The Philips 1.5T Wide Bore MRI services are available Tuesdays-Fridays.

NUCLEAR MEDICINE
Nuclear medicine is a branch of radiology that uses radioactive materials to determine if certain organs such as the heart, kidneys, liver, thyroid, brain and lungs are working properly. It is also used to examine the bones for cancer, infection or trauma. Patients receive a small amount of radioactive material called a radioisotope which is injected or swallowed. In many cases, a delay exists between the time the material is administered and the test begins. This allows the isotope to flow through the body and concentrate in the organ that is being examined. By tracking the isotope as it moves through the organ, doctors receive valuable information about how a specific bodily organ is functioning.

ULTRASONOGRAPHY (US)
Our equipment is an GE Logic E9 Ultrasound machine. A wide range of services are offered including; abdomen, pelvic, thyroid, breast, nonvascular imaging and vascular imaging, CDVT, carotids, OB/GYN, renal and aorta screening. All technologists are registered diagnostic medical sonographers.
ANCILLARY SERVICES
LABORATORY / NUTRITION COUNSELING / REHABILITATION SERVICES

MAMMOGRAPHY
Services performed using Hologic 3D Mammography machine. We offer screening and diagnostic exams. Monday-Friday 7:30 am – 5:00 pm.

LABORATORY
New London Hospital’s Baker Memorial Laboratory is a full service lab providing on site testing for the majority of all tests ordered by area physicians. The technical staff are certified by the American Society of Clinical Pathologists or its equivalent. The Lab is accredited by the College of American Pathologists. Unusual or low volume tests are sent to one of several outside reference labs.

Emergency laboratory services are available 24 hours per day.

LABORATORY SITES:
NEW LONDON HOSPITAL 526-5305 NEWPORT HEALTH CENTER 863-4100
273 County Road, New London 11 John Stark Highway, Newport
Open: 7:00 am – 5:00 pm Monday through Friday  Open: 8:00 am – 4:30 pm Monday through Friday (by appointment)
8:00 am – 12:00 noon Saturday
Wednesday 7:00 am – 7:00 pm
Closed Sunday

NUTRITION COUNSELING
Nutrition counseling and education is available at New London Hospital and the Newport Health Center. Our dietitians, Birgit Humpert RD, LD and Elke Melody, RD, LD are registered by the Commission on Dietetic Registration and licensed by the State of New Hampshire. Their specialties include weight management, chronic disease management, diabetes, pediatrics, sports nutrition, and wellness. They work with patients of all ages in a family-centered counseling environment. For more information, call 603-526-5229.

REHABILITATION SERVICES
Rehabilitation plays a vital role in restoring and maximizing a patient’s independence and function for daily living, mobility, strength, and self-confidence. Our goal is to give all of our patients individualized care using best practice for a safe, effective recovery in the shortest period of time. Rehabilitation services are offered in New London and at the Newport Health Center.

Rehabilitation Services include the following:
• Arthritis treatment
• LSVT program for Parkinsons
• Lymphedema management
• Gait disturbance evaluation
• Strains and sprains
• Pelvic therapy program
• Neurological disorders treatment
• Upper extremity conditions
• Foot Orthotics (temporary and permanent)
• Post surgical therapy
• Sports medicine clinic
• Speech therapy (voice, neurocognitive, language, and swallowing disorders)

• Ergonomics
• Vestibular and Vertigo therapy
• Functional Capacity Evaluations
• Balance
• Spine and back conditions
• Lymphedema
• Occupational therapy
• Orthopaedic conditions
• Physical therapy
• Upper extremity splint fabrication
• Student program

INPATIENT CARE: Rehabilitation Services are available six days per week, with the patient being seen within 24
hours of a written request by the physician. The state-of-the-art therapy services include physical, occupational and speech therapies.

OUTPATIENT CARE: Sports Medicine and Rehabilitation Services are available in New London at the New London Hospital and at the Newport Health Center in Newport.

SPORTS MEDICINE AND THERAPY SERVICES
273 County Road, New London, NH • 526-5256

NEWPORT HEALTH CENTER
11 John Stark Highway, Newport, NH • 863-8936

MEDICAL-SURGICAL UNIT
Our Medical-Surgical Unit provides both acute and skilled levels of care. A team of professionals and support staff provide personalized care for the patient and his/her family while they are in the hospital. Physicians and nurses collaborate daily on treatment and discharge plans working toward a speedy recovery.

SPECIALIZED CARE UNIT (SCU)
The four-bed Specialized Care Unit is equipped with sophisticated monitoring systems and staffed with nurses who are certified in advanced life support and critical care nursing. The Special Care Unit provides constant monitoring and personalized treatment for patients who are critically ill.

SKILLED/SWING BEDS
Skilled/Swing Beds allow patients who need a short period of skilled nursing or rehabilitation services following discharge from an acute care setting to stay at New London Hospital, rather than being moved to an out-of-town nursing facility. Some patients may be transferred from another acute care facility for a short recovery period prior to returning to their home.

SOCIAL SERVICES
This department provides Social Services to the inpatient population, ambulatory setting, and extended care residents. Collaborating with the health care team, patients, their families and the community, Social Services provides a continuity of care that promotes a smooth transition from the hospital to home or elder care setting.
